India and the Unreached

India remains a key reason Jesus has not yet returned, as many ethnic groups there remain unreached — without believers or churches.

- **Most Unreached:** India has the highest number of unreached people groups, with 90% of its population unreached.
- **Population:** Now the most populous country on earth.
- **Religious Landscape:** 2.5%-6% are Christian, while the majority are Hindu, Muslim, or Sikh. India also has the largest Muslim population globally.
- **Spiritual Challenge:** Hinduism recognizes 330 million gods, including Jesus, but not as Lord. Yet, Acts 4:12 declares salvation is through Christ alone.

Crossroads' Mission:

We support 23 families through one agency in India, along with two additional couples involved in linguistic work, evangelism, and discipleship. Join us in praying for their ministry and the spread of the Gospel.
